

Komronbek Xusniddinov

Python Backend Developer | komronbekx1@gmail.com | [komronbekx](#)

SUMMARY

Python Backend Developer with 8+ months of hands-on experience building and delivering commercial web applications using Django, DRF, and PostgreSQL. Successfully completed and sold 2 freelance projects to real clients, including a live MVP platform with active users. Focused on REST API development, Docker containerization, and writing clean, maintainable code following SOLID principles.

EXPERIENCE

Backend Developer | Self-employed · Remote

Feb 2026 – Apr 2026

- Led backend architecture and development of a Q&A platform API ([aiautomation.uz](#)), delivering a production-ready system from concept to launch
- Engineered 12+ RESTful API endpoints and 7+ database models with Django REST Framework and PostgreSQL, supporting core platform functionality and data management
- Designed and implemented OAuth2 and Google authentication workflows, enhancing security and simplifying user access
- Established application monitoring and error-tracking pipelines using Sentry and BetterStack, reducing issue detection time and improving system reliability

Full-Stack Developer | Self-employed · Remote

Aug 2025 – Sep 2025

- Designed, developed, and launched [vetmedikal.uz](#) for a poultry veterinary company, delivering a production-ready commercial website with a 72-product catalog within a 1-month timeline([vetmedikal.uz](#))
- Implemented multilingual support (Uzbek, Russian, and English)
- Developed a custom Django admin panel for managing products, vaccines, medicines, and website content, allowing non-technical staff to perform day-to-day updates independently
- Built both frontend and backend components using Django Templates, ensuring seamless content management, maintainability, and responsive user experience

PROJECTS

Question Platform API ([Github](#)): Q&A platform backend with 12+ endpoints and 7+ models. Features custom OAuth2 & Google login, Sentry + BetterStack monitoring. Responsible for full backend architecture. Applied SOLID & DI principles.(live on: [aiautomation.uz](#))

Vetmedikal website ([Github](#)): Created a full-stack corporate website for a poultry products company using Django. Features include a custom admin panel, product catalog, company achievements, and full support for 3 languages — built frontend + backend.(live on: [vetmedikal.uz](#))

SKILLS

Languages: Python, SQL

Backend: Django, Django Rest Framework(DRF), FastAPI, JWT

Frontend: HTML, CSS, JavaScript

Database: PostgreSQL, SQLite

Caching & Task Queues: Redis, Celery

DevOps & Cloud: Docker, Docker Compose, Digital Ocean, Nginx, Git(Gitgub, Gitlab), CI/CD

Principles & Architecture: SOLID, Clean Architecture, Layered Architecture, DI

EDUCATION & ACHIEVMENTS

Tashkent State Technical University

Sep 2023 – Present(Expected Graduation: 2027)

Bachelor of Science (BSc) in Artificial Intelligence

Fulfil Education | Certificate 2025

Feb 2025 – Sep 2025

Python Backend Development

IT Time Academy

Oct 2025 – Jul 2026

Frontend Development
