

Komronbek Xusniddinov

Python Backend Developer

+998 (99) 935-77-79 | xusniddinovk1@gmail.com | [Github](#)

SUMMARY

Python Backend Developer with 8+ months of hands-on experience building and delivering commercial web applications using Django, DRF, and PostgreSQL. Successfully completed and sold 2 freelance projects to real clients, including a live MVP platform with 10+ active users. Focused on REST API development, Docker containerization, and writing clean, maintainable code following SOLID principles.

EXPERIENCE

Freelance Backend Developer | Self-employed · Remote Feb 2026 – Apr 2026

- Led backend architecture and development of a Q&A platform API ([aiautomation.uz](#)), delivering a production-ready system from concept to launch
- Engineered 12+ RESTful API endpoints and 7+ database models with Django REST Framework and PostgreSQL, supporting core platform functionality and data management
- Designed and implemented OAuth2 and Google authentication workflows, enhancing security and simplifying user access
- Established application monitoring and error-tracking pipelines using Sentry and BetterStack, reducing issue detection time and improving system reliability

Freelance Full-Stack Developer | Self-employed · Remote Aug 2025 – Sep 2025

- Designed, developed, and launched vetmedikal.uz for a poultry veterinary company, delivering a production-ready commercial website with a 72-product catalog within a 1-month timeline
- Implemented multilingual support (Uzbek, Russian, and English) using Django i18n, enabling the company to serve customers across three language markets through a single platform
- Developed a custom Django admin panel for managing products, vaccines, medicines, and website content, allowing non-technical staff to perform day-to-day updates independently
- Built both frontend and backend components using Django Templates, ensuring seamless content management, maintainability, and responsive user experience

PROJECTS

Question Platform API ([Github](#)): Q&A platform backend with 12+ endpoints and 7+ models. Features custom OAuth2 & Google login, Sentry + BetterStack monitoring. Responsible for full backend architecture. Applied SOLID & DI principles. (live on: [aiautomation.uz](#))

E-commerce API ([Github](#)): Backend for an online store with product catalog, categories, cart and order management. 10+ endpoints, automated tests, and async task handling via Celery.

Vetmedikal website ([Github](#)): Created a full-stack corporate website for a poultry products company using Django. Features include a custom admin panel, product catalog, company achievements, and full support for 3 languages — built frontend + backend. (live on: [vetmedikal.uz](#))

SKILLS

Languages: Python

Backend: Django, Django REST Framework, FastAPI, Celery, Redis

Frontend: HTML, CSS, JavaScript

Databases: SQLite, PostgreSQL

Cloud & DevOps: Docker, Nginx, Git (GitLab, GitHub), GitHub Actions(CI/CD), Postman

EDUCATION

Tashkent State Technical University
Bachelor of Science (BSc) in Artificial Intelligence

Sep 2023 – Present(Expected Graduation: 2027)

Certifications

Fulfil Education Certificate 2025	<i>Feb 2025 – Sep 2025</i>
Python Backend Development	
IT Time Academy	<i>Oct 2025 – Present</i>
Frontend Development
